MEMORANDUM FOR: Chief, Military-Economics Division, ORR

25X1A ATTENTION: [REDACTED]

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Search for Military Installation, Karwice, Poland

REFERENCE: (a) Requirement C-RR-3-80,873  
(b) CIA/PID Project C 1788-63

1. This memorandum is in response to your requirement dated 13 December 1963 requesting a search of the Karwice, Poland area for military installations and evidence of tactical missile deployment.

25X1D 2. A search for photography over the area of interest reveals that the only mission of satisfactory quality and coverage is KEYHOLE [REDACTED]. In searching for installations of possible military significance the following observations were made:

a. Thirty-nine nautical miles (nm) east-northeast of Karwice there is an ammunition storage area, a barracks area, and track activity indicating a probable tank drivers training area.

b. On the west edge of Karwice there is light track activity over an area approximately five to six miles long by two to three miles wide. The lack of barracks and other military buildings, however, indicates this may be a temporary training area or non military.

c. A rail-to-road transfer point 14 nm south-southwest of Karwice.

d. A possible ammunition storage area 11 nm south-southwest of Karwice.

e. An extensive training area 23 nm east of Karwice, and immediately northeast of Reclivity Airfield. Track activity and a firing range indicate a tank training ground. Ground targets and pit scarring northeast of the airfield reveal a practice bombing area is associated with this training ground. Two barracks areas within the training grounds indicate it is probably a permanent installation. Evidence of tactical missile deployment or training can be neither confirmed nor negated at this time.
